TENWARD
GROUP

WHO WE ARE

Tenward Group LLC is a Michigan-based veteran-owned small business that helps commercial, industrial, government, and defense organizations execute complex programs from initial planning through final delivery. Tenward serves as the integration layer between customer requirements and execution - aligning people, suppliers, schedules, risks, quality, resources, and contractual commitments to keep work moving and outcomes accountable.

CORE COMPETENCIES

- Program & Project Leadership - integrated planning, execution governance, schedule ownership, risk management, issue resolution, and stakeholder coordination.
- Supplier & Manufacturing Integration - supplier readiness, recovery support, milestone tracking, production coordination, quality-interface management, and delivery execution.
- Contract & Subcontract Execution - requirement flow-down, action tracking, customer/supplier coordination, deliverable management, and execution discipline.
- PMO & Embedded Leadership - scalable program leadership, project controls, reporting cadence, governance, decision support, and cross-functional integration.
- Work Breakdown & Pricing Support - scope decomposition, work-package development, resource planning, cost build-up, and pricing coordination.
- Performance Recovery - troubled-project stabilization, critical-path focus, corrective-action follow-up, escalation management, and accountable closure.

DIFFERENTIATORS

- 18+ years of commercial and government logistics experience with project-management responsibility.
- PMP, Certified ScrumMaster, Six Sigma Green Belt, and MBA in International Business.
- Operator mindset: Tenward is structured around execution ownership rather than advisory-only consulting.
- Lean, scalable model that can integrate customer teams, specialist partners, and qualified suppliers without unnecessary fixed overhead.
- Single point of accountability across program, supplier, schedule, quality, and customer interfaces.

CUSTOMER & ENGAGEMENT FIT

- Federal, defense, state/local, and commercial organizations requiring program execution support.
- Prime contractors needing reliable project, supplier, subcontract, or mission-support capacity.
- Industrial and manufacturing organizations managing complex suppliers, launches, transitions, or recovery actions.
- Engagement models: direct support, embedded leadership, prime/subcontract support, teaming, and project-specific execution.
